EXAMINER

LEE, SEUNG H

ART UNIT PAPER NUMBER

2876

DATE MAILED: 06/02/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Applicati n N .

09/807,885

Applicant(s)

BERTRAND ET AL.

Examiner

Seung H Lee

Art Unit

2876

Aw

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 23 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-12, 14 and 15 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-12, 14 and 15 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

### **DETAILED ACTION**

1. Receipt is acknowledged of the response filed on 23 March 2004, which has been entered in the file.

### ***Claim Objections***

2. Claims 11 is objected to because of the following informalities:  
Re claim 11, line 2: Substitute "its contacts" with --the chips contacts--,  
Re claim 11, line 3: Substitute "its connection" with --the chips connection--.  
Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jarvis (EP 0,350,179) in view of Kohama et al. (US 6,412,701)(hereinafter referred to as 'Kohama').

Jarvis teaches a method of manufacturing portable electronic tokens such as a smart card type comprising a copper layer (7) having a integrated circuits (1) and an inductive coils (4) serving as an antenna, wherein the integrated circuits and the inductive coils serves as functional elements and moulded plastics (e.g., dielectric

Art Unit: 2876

material) (8) bonded to all the circuits therewith in which the copper layer and the moulded plastics together serves as a support sheet, the resin, components, and a labels (6) serving as a covering layer are fed or extruded into a die to form continuous strips of completed cards then separated as desired, the integrated circuits and the coils are preinstalled on the copper layer prior to fed into the die, 2 pairs of pinch rollers (12 and 13) locating opposing side of the labels to mark the ends of each labels (see Figs. 1-3; col. 1, line 7-col. 4, line 10).

However, Jarvis fails to particularly teach that the smart card type is contactless type, the support sheet is a conductive grille, the copper layer is packaged in the form of a coil to be unwound continuously, and a chip and the entire connection wire are embedded a resin.

Kohama teaches a method of manufacturing a contactless IC card comprising an IC module (10) drawn off from a roller (71) continuously wherein the IC module having an antenna (2) in grille form, wherein a chip (1) connected to the antenna via terminals (1a) in which the chip and the antenna is embedded in a resin (see Figs. 1-3 and 17; col. 8, line 38-col. 10, line 22; col. 18, line 43-col. 19, line 6).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teachings of Kohama to the teachings of Jarvis in order to speed up the production rate of the smart card by supplying the IC module having necessary circuits installed thereon continuously from the roller, and therefore an obvious expedient.

5. Claims 9 and 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jarvis as modified by Kohama, and further in view of Melzer et al. (US 6,305,609)(hereinafter referred to as 'Melzer').

The teachings of Jarvis/Kohama have been discussed above.

Although, Jarvis/Kohama teaches that the method of manufacturing the IC card, they fail to particularly teach that the support sheet has at least one opening through which the bottom and top layers are joined.

However, Melzer teaches a process for manufacturing data card comprising a carrier film (8) having a module element (5), a top layer (3), and a bottom layer (4) wherein the carrier film containing a cavities or depressions (13) serving as an opening in which leveling material (14) fills the cavities for joining the module element and the top layer and the bottom layer (see Figs. 1-2; Abstract; col. 6, line 65-col. 8, line 30).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teachings of Melzer to the teachings of Jarvis/Kohama in order to improve a shape of the data card or the smart card by evening out the height difference due to the substructures of the module elements between the top layer and the bottom layer using leveling material therewith, and therefore an obvious expedient.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1-12 and 14-15 have been considered but are moot in view of the new ground(s) of rejection.

In response to applicant argument that "...not employ an extrusion process to form the cover sheet and place it on the electric components." (see page 6, line 4+), the Examiner respectfully provides a Jarvis reference wherein the Jarvis teaches a method of manufacturing the smart card using extruding process as discussed in paragraph 4 above.

### ***Conclusion***

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Seung H. Lee whose telephone number is (571) 272-2401. The examiner can normally be reached on Monday to Friday from 7:30 AM to 4:00 PM.

If attempt to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee, can be reached on (571) 272-2398. The fax-phone number for this group is (703) 872-9306.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [seung.lee@uspto.gov].

*All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35*

Art Unit: 2876

*U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.*

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
